

DESIGN ENGINEERING SERVICES

About Our Services

Kimball provides comprehensive, end-to-end program management, offering in-house design capabilities and leveraging both internal and external resources to ensure manufacturability. Each project is customized to meet the specific needs of the customer, with our team working to create and facilitate the best process to align with your timeline and deliverables.

With over 30 years of design engineering experience, Kimball partners across all areas of engineering to drive innovation and provide multidisciplinary expertise. The process is fully customizable, operates on a cost-pass-through, not-for-profit model, and is only complete when the product reaches full production. Customers retain full ownership of their intellectual property, and Kimball supports global manufacturing, seamless product launches, and smooth transitions for new product introductions.
