

Industrial Manufacturing at Kimball Electronics

A Story of a Lasting Relationships and Global Success

For seven decades, Iskraemeco has been delivering quality products and services that make efficient energy use a reality to energy companies worldwide. The Iskraemeco portfolio includes electricity meters for a wide variety of applications. With one of the largest R&D departments in the industry, Iskraemeco turns advanced ideas into reality and provides utility companies with quality and next-generation sustainable energy solutions. Their full suite of smart metering devices, services, and solutions help ensure a smarter grid.

Smart meters feature a communication interface that enables automated meter reading and readies the meter for use in advanced metering infrastructure (AMI) systems. Kimball Electronics manufactures electronic assemblies at the heart of functionality for these meters. High quality manufacturing processes enable the meter to deliver the performance and data security expected in residential and small commercial environments.

Kimball Electronics supports top customers in the access control and security market. Built-in Bluetooth® enables electronic wireless locks to connect directly to smart phones and tablets with no need for a proprietary handheld device for set-up and configuration. And with built in Wi-Fi, locks can connect directly to an existing Wi-Fi network enabling automatic updates to lock configuration and user access.
