

Christine Steinhart

Production Manager
Kimball Electronics Jasper

▣ Started at Kimball Electronics in 1986

- Christines is from Jasper where she spends most of her free time either camping with her friends or having some quiet time with her family along with her dog Cami.
- Certain day-to-day activities are more enjoyable than others. Christine enjoys managing the SMT and Thru hole lines, with that she identifies what gets ran in the order it needs to so the areas following have plenty of time to make the customer shipments.
- The company brings a sense of family, everyone works together to achieve the same goal. Everyone's job here matters and we couldn't move forward and continue to grow without everyone working together. Along with this, the company provides outside training to help people continuously grow with it the most unique thing about Kimball.
