

Radostaw Chudy

IT Automation Engineer
Kimball Electronics Poland

▣ Started at Kimball Electronics in 2017

- Radostaw is from Poznań, Poland where he likes to watch soccer and volleyball matches and spend lots of time with his family.
- He has been with Kimball for nearly eight years, beginning his career as a Process Engineering Technician on the Mechanical Assembly Engineering team. After two years, he was promoted to Process Engineer, and in 2025, he transitioned into the IT department. He enjoys programming automation equipment and values the opportunity to collaborate with others, especially when solving challenges related to production machines and assembly lines.
- What he loves most about working at Kimball is the opportunity to innovate and continuously expand his knowledge. His greatest achievement to date has been completing a Lean Six Sigma Belt project, where he was responsible for defining specific requirements for a new machine and enhancing the heat stake process for one of Kimball's customers
