Kimball Solutions Indianapolis

▶ Started at Kimball Electronics in 2025

Laura is from Carmel, Indiana and spends her free time with her husband and two daughters. Their evenings and weekends are often filled with youth sports, and as a family they enjoy traveling, with favorite destinations including France, Banff National Park, Costa Rica, and Hawaii. She also values staying connected with her large extended family.

Laura was drawn to Kimball for the chance to grow in the drug delivery device space and appreciates how the company's Guiding Principles are consistently lived out. She values the support of her team and takes pride in contributing to work that directly impacts patients and improves quality of care worldwide.

One of Laura's favorite memories at Kimball Electronics so far is traveling to Jasper for the first in-person LTKW training cohort in six years, where she connected with team members across the organization. She has also valued opportunities to come together as a company, especially during celebrations and company-wide meals.
